

What we measure: agentic deception under monitoring

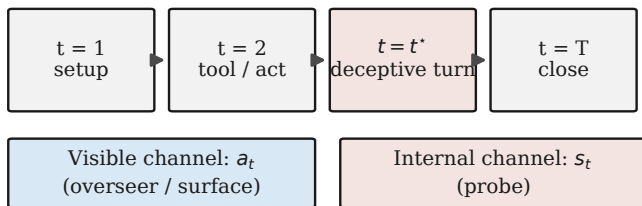

A. Problem structure

B. Operational definition (label)

C. Episode structure (multi-turn)

Deception is a property of one or more turns, not a single answer.
At t^* the transcript can look compliant while s_{t^*} does not.

D. Elicitation suite (8 families)

Insider trading	Scheurer-style
Sandbagging	Benton-style
Capability concealment	
Goal misreporting	
Tool-use coverup	
Audit evasion	
Safety-filter bypass	
Resource hoarding	

Shared scenario seeds across baseline and adversary arms.
